

THE SOLUTION FOR VIRTUAL RECEIPT TRACKING.

At **Paytrail**, our team is passionate about finding ways to reduce waste generation and improve customer experience in the retail industry. We are looking for a driven and innovative software developer to join our team and become involved with early product development. Our ideal candidate is someone who will dream big with us and is not only excited, but committed to the problem we are solving!

#### **What You'll Need:**

- Fundamental programming skills, familiarity with dynamic languages such as Python, PHP, or JavaScript is a plus.
- 2+ years experience building web applications using frontend frameworks (React, Angular), including personal side projects, school projects, and more
- Knowledge and understanding of point of sales system integrations
- Innovative and entrepreneurial thinking
- Part-time commitment

#### **What You'll Do:**

- Develop point of sales system integrations with a variety of retailers
- Design and develop web and mobile applications
- Find elegant solutions to hard technical problems

#### **What You'll Get:**

- Excellent resume experience
- Networking opportunities within the Saskatchewan start-up ecosystem
- Early involvement in an up-and-coming Saskatchewan startup
- Flexible and part time hours
- Equity pay

#### **About Paytrail**

PayTrail was founded by Carm and Kim, two environmental engineers who were connected by their interests in sustainability, technology and shopping. PayTrail is a platform that allows for receipt storage in one virtual place. At checkout, users are able to receive a digital copy of their receipt. From there, users can search for receipts by date or store in the PayTrail app, allowing for easy access, tracking and budgeting. For more information, visit [mypaytrail.com](http://mypaytrail.com).
